WEATHERIZATION BARRIER INITIATIVE

RECESSED LIGHTING/ ATTIC FLOORING REMEDIATION FORM

During your Home Energy Assessment, we noted that attic flooring and/or recessed lighting must be addressed before the recommended work to improve your home's energy efficiency can begin. Please see the instructions below for both instances, as well as a special offer from Mass Save to help cover the cost of attic flooring removal and lighting evaluation.

CUSTOMER INSTRUCTIONS

Once your Energy Specialist and electrician/contractor have completed their assessments and filled out the information below, **please send this completed form with completed copies of the dated and itemized contractor invoice/agreement to:**

Submit signed and completed copies of this Contractor Evaluation Report and a copy of the dated and itemized Contractor Invoice to the Participating Home Performance Contractor that completed your Home Energy Assessment.

CUSTOMER INFORMATION

Address: _____ City: _____ State: _____ ZIP: _____

Phone Number: _____ Email: _____

RECESSED LIGHTING

If you decide to have any lighting fixtures covered or made in contact with insulating materials, a MA licensed electrician must certify that all fixtures located in the areas indicated below are insulated contact (IC) rated. If you choose not to cover the recessed lighting with insulation, electrician certification is not required and they will be left exposed.

HPC Evaluation: IC rated recessed light verification is needed in the following areas:			
☐ Open attic	☐ Enclosed floor cavity	☐ Enclosed interior slope	☐ All recessed lights

Notes: _____

Electrician Certification And Evaluation

Company Name: _____

Electrician's Name: _____ License #: _____

Address: _____ City: _____ State: _____ ZIP: _____

Phone Number: _____ Email: _____

I have performed an inspection of the lighting fixtures and have either replaced and/or verified that all recessed lights are IC rated in the following areas:

Open attic	**Enclosed floor cavity**	**Enclosed interior slopes**	**All recessed lights**
☐ Yes ☐ No	☐ Yes ☐ No	☐ Yes ☐ No	☐ Yes ☐ No

Electrician Signature: _____

ATTIC FLOORING

Mass Save will cover up to $250 toward the cost to remove attic flooring so weatherization work can proceed. The cost will be deducted from the co-payment amount noted in your contract. Note: A rebate check will only be issued if the incentive amount exceeds your co-payment amount.

Energy Specialist Evaluation: Attic flooring removal is needed and fits the following description:						
☐ Plywood	☐ Planks	☐ Screwed down	☐ Nailed down	☐ Unsecured	☐ < 500 sq. ft.	☐ > 500 sq. ft.

Flooring Removal Agreement

HPC Representative: _____ Date: _____

TERMS AND CONDITIONS

Contractor Responsibilities and Acknowledgment: In performing any work in connection with the Weatherization Barrier Incentive (as set forth in detail below), the contractor shall: (i) abide by all local, state and federal guidelines, applicable laws (including, but not limited to all applicable environmental laws), building codes, regulations (including, but not limited to EPA lead-safe and any and all other applicable environmental regulations) and licensing requirements; and (ii) stop work and immediately notify the customer in any case where existing or possible health and/or safety problems exist. The contractor must fill in and sign off on the testing results in the appropriate place on this form. Contractor shall remain solely and fully responsible for their confirmations and notes that they provide on this form and with respect to the Contractor Responsibilities set forth above.

Application Form: This application must be filled out completely, truthfully and accurately. The customer must date and submit the completed application along with all required documentation for specific rebates. By submitting the rebate application, the customer agrees to abide by these Terms and Conditions.

Certification: The electrician's sign-off is not necessary in order to move forward with most program-eligible work. It only needs to be completed if the homeowner would like insulation to be blown over and in contact with existing recessed lighting fixtures in the areas designated by the energy specialist.

Insulation Contract: Your energy specialist has specified on your insulation contracts to add "damming" material around your existing recessed lights to keep any new insulation from coming in contact with the impacted recessed lighting. If your electrician signs this form to certify the recessed lights are IC rated, then your contract will be revised to have this line item removed.

Liability: Due to the liability involved with signing this type of form, we suggest you show or describe this form to your Massachusetts licensed electrician prior to hiring him/her to inspect your home, to be sure he/she is willing to sign it. CLEAResult and the Mass Save Home Energy Services Program will rely on the licensed electrician's determination and certification and will not be liable if it is inaccurate.

Customer Eligibility: Applicant must be a residential customer of a participating utility, and participate in the Mass Save Home Energy Services Program (and must reside in a 1-4 unit family home). Customer must complete the recommended weatherization improvements to receive the applicable incentive. Customer must submit the completed Contractor Evaluation Report along with a copy of the dated and itemized contractor invoice on company letterhead postmarked within 60 days of the Home Energy Assessment. If contractor invoice is not provided within 60 days, applicable incentive may be forfeited.
